2002 lexus es300 headlights

Lake Chevy helped make these videos. The video above shows you to replace the headlight in your Lexus ES Changing both headlight bulbs on your ES at the same time will allow both bulbs to have the same intensity and prevent the new headlight bulb from appearing brighter than the bulb on the opposite side. In some Lexuss, the highbeam is the same bulb as the headlight and it is possible for the highbeam to work, but the headlight be burnt out even if they are the same bulb and vise versa. Some Lexuss have high intensity discharge headlights, sometimes referred to as xenon lights. These bulbs have a very high voltage that runs through them, even if the battery is disconnected. If your ES has this type of bulb, we do not recommend that you attempt to change it yourself. When you change the headlight on your ES, it is important to not touch the glass part of the bulb with your fingers because the oil from your fingertips will cause that part of the bulb to burn hotter, which significantly shortens the life of the bulb. Verified Purchase. Bought these to replace my yellowing headlight assemblies. I was leery of some lower priced options because I wanted no issues with fit or installation-plus, I liked the halo feature. These arrived well packaged and undamaged. This is not too a big of a deal-there are instructions online if yo need them. The bumper does not have to be completely removed, just eased forward and down a bit. The final appearance is all I expected - bright lights and a great effect from the halos. A few points that prevented a 5 star rating, though: 1 Inexplicably, these arrived with a Mazda connector for the low projector beams. Other connectors were correct, but the Mazda connector is incompatible with Lexus. I had to find and separately order some H11 sockets to splice onto the low beams Look up and download headlight aiming instructions for the ES You will need them. If one of these burns out, I expect it will be a major project to find replacements. Plus, no way to change these without removing the headlight assemblies again. If you're willing to cope with these issues, the end result is striking. These lights are awesome! The LED side lights require an extra step but are easy to install.
