2006 mitsubishi endeavor ls

The Mitsubishi Endeavor is a solid all-around crossover SUV for those who crave nontraditional styling in a comfortable, easy-to-drive package. If you don't need a third-row seat, it's definitely worth a look. In some ways, Mitsubishi has embraced its role as a niche player in the bigger automotive picture. Mitsubishi cars and trucks used to be nothing more than second or third runners-up to more popular brands like Honda and Toyota, but recent strides in both product and marketing have helped it to carve out its own unique niche. Admittedly, Mitsubishi has not reinvented the midsize crossover SUV, but it has put its own stamp on it with regard to styling, comfort and performance. The Endeavor shares its prominent front-end design, a recent Mitsubishi styling cue, with such vehicles as the Galant and Outlander. Built on the "Project America" platform specifically designed for the U. Because of its car-based underpinnings, the Mitsubishi Endeavor is a crossover vehicle rather than a traditional SUV. By combining carlike characteristics like sharp handling and a smooth highway ride, the Endeavor doesn't force buyers to choose between sport and utility. The Endeavor's 3. Mitsubishi has taken steps to ensure that the Endeavor's go-anywhere look is backed up by some off-road ability. Ground clearance is just over 8 inches. Inside, this five-passenger SUV is roomy enough to accommodate even the tallest adults, and the well-cushioned seats provide exceptional comfort on long road trips. Cargo capacity is a bit less than competitors offer, but should be adequate for most families. The design of the interior is edgier than the conservative furnishings in the Pilot and Highlander, as there's plenty of metallic trim along with ice-blue backlighting. One downside is that the Endeavor's materials quality doesn't measure up to either of these rivals. While the Endeavor's lack of a third-row seat and side curtain airbags may limit its appeal on carpool days, family-oriented buyers would be wise to take a look at its well-rounded package. Along with unusual styling, the Mitsubishi Endeavor offers a very likable combination of performance, comfort and practicality. The LS comes with standard features like inch alloy wheels; air conditioning; power windows, locks and mirrors; remote keyless entry; air conditioning; a watt CD stereo; a full-size spare tire; and towing preparation. The Limited adds items like a power driver seat, a watt stereo with an in-dash six-disc CD changer and an automatic climate control system with separate rear controls. Available options include a sunroof, leather seating, heated front seats and a rear-seat DVD entertainment system which unfortunately isn't available in conjunction with the sunroof. A navigation system is not available. All Mitsubishi Endeavor models come with a 3. Output is rated at horsepower and a substantial lb-ft of torque. Although many vehicles in this class offer more horsepower, the Endeavor's ample torque gives it an equally powerful feel. Two-wheel-drive models are front-wheel drive, and all-wheel-drive models utilize a full-time system with a viscous center differential. Fuel economy estimates are 17 mpg city and highway. Antilock brakes and traction control are standard on all models, as are front-seat side airbags and a tire-pressure monitoring system. A stability control system is optional on 4WD Limited models. Side curtain airbags are not available. The Endeavor scored five stars across the board for side-impact protection. Due to the Endeavor's impressive lb-ft of torque, the 3. The transmission can be a little slow to downshift on highway grades, but overall the Mitsubishi Endeavor performs as well as most other vehicles in the class. Its car-based chassis provides a comfortable ride on the street, adept handling in the corners and above-average capability on mildly rutted dirt roads. The steering is a little slower to react than we'd like, but the weighting seems perfectly balanced for everyday errand running and commuting. A large center console dominates the interior, giving the Endeavor a slightly different look than most other sport-utes. In keeping with the exterior's bold and unique design, sporty faux metallic trim is used throughout the cabin. A small screen placed atop the dash provides vital radio, compass and climate information, but it doesn't support an optional navigation system. Like most other sport-utes in its class, the Mitsubishi Endeavor uses a flip-up rear hatch along with a separate lift-glass for added convenience. Cargo capacity maxes out at 75 cubic feet, less than the Pilot, Murano or Explorer. Doing so could save you hundreds or thousands of dollars. Edmunds also provides consumer-driven dealership sales and service reviews to help you make informed decisions about what cars to buy and where to buy them. Simply research the type of car you're interested in and then select a used car from our massive database to find cheap prew-owned vehicles for sale near you. Once you have identified a used vehicle you're interested in, check the AutoCheck vehicle history reports, read dealer reviews, and find out what other owners paid for the Used Mitsubishi Endeavor. Is it better to lease or buy a car? Ask most people and they'll probably tell you that car buying is the way to go. And from a financial perspective, it's true, provided you're willing to make higher monthly payments, pay off the loan in full and keep the car for a few years. Leasing, on the other hand, can be a less expensive option on a month-to-month basis. It's also good if you're someone who likes to drive a new car every three years or so. For , the Mitsubishi Endeavor gets revised front and rear styling and some interior trim revisions. The XLS trim level has been dropped, while the Limited's leather seating and heated seats are now optional instead of standard. On the positive side, antilock brakes are now standard on all Endeavors and 2WD versions receive standard traction control. Read more. Write a review See all 30 reviews. My wife and I purchased this SUV several weeks ago. So far we really love it. It's quiet, fast, handles like a luxury car that's a good thing , and has a great transmission. The sound system is very good and I love the display in the dash. I can't believe Mitsubishi is not selling these things as fast as they can build them. It's incredible that such a great vehicle is discounted so much. My wife and I laughed all the way home. And we love that warranty! Plus it got a great rating in Consumer Reports. That's always a MUST!! Read less. I love the way it handles on curving roads. It is a very soft ride, but no swaying. It handles great and has tons of room for my wife's antique shopping. The transmission is great, being able to shift yourself is nice, especially when going down mountain roads you can put it in 2nd gear and not ride the brake. It does not have a top heavy feel. Overall Mitsubishi did it right. After 3 years, still love it! This vehicle is Mitsubishi's best kept secret. We are quite comfortable traveling long distances, no back aches I get exceptional gas mileage in town, averaging and on the highway our best was 29 mpg! Can't beat that for this sized vehicle. The engine runs smooth, automatic shifts easily and steps right into passing gear when you need it! Awesome Vehicle Great Buy. The Mitsubishi Endeavor runs great. It stands out more than any other vehicle in it's class. It's an instant eye catcher. See all 30 reviews of the Used Mitsubishi Endeavor. Write a review. Frontal Barrier Crash Rating. The mid-level XLS trim has been dropped, reducing the total number of Endeavor variants to four. ABS has been added to the base LS standard features list, and all front-wheel drive models now come with traction control. The Limited loses leather upholstery and heated seats, but both are still available as options. These changes are part of a mid-cycle update, which includes some interior and exterior design alterations. The Endeavor lineup is available with LS and Limited styles, and both can be had with either front or all-wheel drive. Convenience items like air conditioning, full power accessories, keyless entry, and CD player are standard across the board. All Endeavors also get inch alloy wheels, tow preparation and a full size spare. The Limited is set apart by a more powerful stereo, a power driver seat and automatic climate control. All Endeavors are powered by a 3. This engine delivers horsepower and pound-feet of torque. The Endeavor is set apart from mid-size crossover competitors by its unique styling, and this has been a strong selling point for consumers. Reviewers report that the Endeavor offers a fine blend of car and SUV elements, adding the Endeavor combines a car-like ride, 4x4 abilities and adequate cargo space 75 cubic feet in one attractive package. The interior design is also rather bold, with metallic trim and blue backlighting. A closer examination reveals some lower grade materials, but the Endeavor's cabin is definitely distinctive. This SUV does not offer third row seating or an optional navigation system. Where is the fuel pump located in my Mitsubishi endeavor? Average user score. Based on 5 reviews. Stock photography by izmo, Inc. Read our Cookie Policy. Not only not only did this SUV perform above and beyond any expectations. Has more horsepower then any SUV in its class. I feel like Mitsubishi did something right with this I'll definitely be buying another one. I love the visibility and the handling. The size makes it easy to fit my whole family without compromising ease of. Car has been parked under carport and taken care of from elements. Very reliable and good gas mileage. Only repairs are usual oil change, brakes, and tires, wiper blades. Had 1 issue with trim, rails on top paint fading. Inside is like new, had headliner replaced, due to a tear caused by carrying an item in rear. This car is very reliable and comfortable. I use it constantly and it has never failed. This car is a larger SUV which is good for hauling stuff and passengers but it does have a longer wheelbase which makes it slightly harder to maneuver in tight spaces. It offers about miles per gallon which is decent for an SUV. Only drawback is the horrible noise if you don't crack the back windows open wide enough. Everything else is good. It offers lots of space and decent mileage but is not fancy. It is a tough reliable car for everyday use. When I drive out of town on the highway I feel totally safe! The kids are always excited to get in and go. There's room for the kids and their friends. We can drop the rear seats and throw in extra belongings or a mattress and just camp out! Have my Mitsubishi for 10 years, no mechanical issues, excellent performance, very economical on highway, accommodate 5 passengers very comfortable. Really good for long road trips. The car is great, we had a similar model when a drunk driver hit us and in some other car we could have died but we were almost fine after the crash because of the car. It also runs great and has good gas mileage and heated seats which are great in the winter. I like how big it is. I do not like that it is not 4 wheel drive. I like that it is spacious. The vehicle is pretty reliable. Though through the years I have had to replace the breaks, fix the spark plugs, and replace the lights due to multiple times they have gone out. Great car, but as it aged, more mechanical and service related issues. Gasket leaking, rear windows fell down needing replacing of gear that makes them go up and down. My vehicle has been great for me thus far, I bought it used a few years back and have not had to put any major work into it yet. It gets the job done and I love the size. It was affordable. It is durable. I have never had any mechanical issues. It is pretty decent on gas. It is comfortable and meets all my needs. The electrical has issues. The car shakes a lot, I took it to get fix but the shaking started again. I love the fuel efficiency of my car. It gets great gas mileage! I also really like the entertainment system it has. It keeps my kids happy on the road! It's an SUV that is not too big, nor too small. There is a good amount of room in the cargo space and the seat can go down to add space to the back. It has been reliable and performs well. Very comfortable seats. Has been reliable; hasn't needed a lot of repairs despite having over 60, miles. Good mileage. It's a really good truck its smooth running however it can have wheel issues and sometimes shifts slow getting on the freeway mine is a and has no aux hook up and one week it's good on gas the next week it eats it up but overall I love my truck. I do not have any particular complaints however I wish there were more safety features like blind side sensors. I love the pick up. I like the overall size of the vehicle. I do not like the fact that the door handles all broke off. Also, I don't like that There is only one key entry on the whole vehicle. I like the body style, interior space, and reliability. I dislike the mpg and lack of aux port. Change Year. Owner Reviews See below. For Sale Near Me. Owner Reviews. Filter by: Rating. Comfort Reviews. Fuel Economy Reviews. Performance Reviews.
