4 way flat trailer wiring harness

Plugging in your trailer wiring and trailer lights is easy with the ergonomic design of this trailer plug. It features tabs on the top and bottom for a better grip when plugging into your vehicle or unplugging. This 4-pin trailer wiring plug comes ready to splice into your existing trailer wiring. It has gauge wires and can be used to connect the taillights, brake lights and turn signals. This trailer connector makes a great replacement 4-flat trailer wiring connector. The 4-pin wiring design matches industry-standard 4-way flat sockets and can be used on a wide variety of trailers. For long-lasting use and a reliable connection, the housing of this 4-pin trailer wiring plug is made from durable black molded rubber that will never rust or corrode. Equipped with blunt-cut, color-coded wires, this 4-prong trailer wiring plug comes ready to install. The inch wire lead provides extra length for an easy installation. Customer Service. Would the uhaul 4 way flat high energy tail light converter work for a Land Rover Range Rover? Will this work on a Honda Ody. Hello Vince, Please visit our Trailer page to check the vehicles this works with. Looking to have a wiring harness installed for towing. Live in Oroville, Ca. Hello Richard, Yes! Hi Larry, U-Haul installs a wide variety of hitch and towing components. Would this work for a Land Rover discovery XD? Hello Iain, Please visit our Trailer Hitches page and enter your vehicle specifications to see all available and compatible hitch models as well as compatible accessories and towing components. I had the local Uhaul place install a hitch and wiring on my Mercedes C last week. This weekend I used a

tester to check the wiring. The trailer 4 pin wiring does not flash for the right turn signal left works properly. The actual right turn signal on the car works properly. I brought it back and they looked at it for a while and said they can't find a problem. I need to rent a trailer next week. Is there anything different about the right turn signal? Any technical advice I can give them? I really need this to work and they seem out of ideas. Hi Robert, Sorry about the issue you are experencing. Our hitch expert suggest this. The location should start testing at the 4-flat, then at the converter box the green wire on both sides , then at the taillight connection. I hope that helps. Good Morning Roberto, Please visit our Trailer Hitches page and enter your vehicle specifications to see all available and compatible hitch models as well as compatible accessories and towing components.
