Sequoia 2007

Now in its seventh year, the Toyota Sequoia is a bit dated, but it's still a capable and comfortable full-size SUV. The largest SUV in the Toyota lineup, the full-size Sequoia is designed to accommodate families who need three rows of seating, a moderate level of off-road talent for accessing campsites and the ability to tow a boat or horse trailer. In reality, only a small percentage of Toyota Sequoia owners use their vehicles for such outdoorsy pursuits, but with its manageable dimensions, refined road manners and comfortable interior, this large SUV has always been a satisfying minivan substitute. Representing the seventh year of the model cycle, the Toyota Sequoia is still a reasonable choice for buyers who want a big, comfy SUV and don't mind spending more on fuel. Just bear in mind that a larger, more powerful Sequoia will arrive for ' Built on the previous-generation Tundra full-size pickup platform, the Toyota Sequoia is roughly the same size as domestic sport-utes like the Chevrolet Tahoe and Ford Expedition, as well as its chief import-brand rival, the Nissan Armada. It rides on a slightly narrower track, though, which results in a bit less hip- and shoulder room in the cabin. Still, there's ample room in all three rows to make the Sequoia useful as a carpool vehicle. Toyota claims that the Sequoia offers the most cargo capacity cubic feet among these competitors, but the company fudged this number a little by taking the measurement with the second-row seats unbolted from the floor an operation that requires hand tools and elbow grease. That doesn't change the fact that the Sequoia is a roomy and practical SUV, and although it's beginning to look dowdy on the inside, it still boasts the best build and materials quality in the large SUV class. If you're shopping for a full-size sport-utility vehicle this year, the Toyota Sequoia is worth checking out. Its rivals offer significantly higher towing capacities, though, so if this is a priority, one of them will probably suit you better. In addition, the Armada and Expedition are apt to be better choices for buyers who use the third-row seat on an everyday basis, while the Tahoe has a more stylish design inside and out. A full-size SUV, the eight-passenger Toyota Sequoia is available in two trim levels -- SR5 and Limited -- with either two-wheel drive or four-wheel drive. Sequoia Limited models come fully equipped with inch alloy wheels, running boards, a sunroof, leather upholstery, heated front seats, an upgraded speaker JBL audio system, a trip computer, an auto-dimming rearview mirror and keyless entry. Many of these features are available as options for the SR5. On both trucks, you can also order extras like an in-dash six-disc CD changer, a navigation system, a rear-seat DVD-based entertainment system and a rear load-leveling suspension. Limited buyers can get a luxury package with second-row bucket seats, electroluminescent gauges, faux wood trim and seat memory. Under the hood of every Toyota Sequoia is a 4. This engine lives up to Toyota's tradition of smooth power plants that deliver seamless power with minimal apparent effort. A five-speed automatic transmission is standard, and four-wheel-drive Sequoias have a low-range transfer case. Properly equipped, the Toyota Sequoia has a maximum towing capacity of 6, pounds 6, on 4x4 models -- less than any of its competitors. Fuel economy rates 15 mpg in the city and mpg on the highway. The Sequoia comes standard with antilock disc brakes with brake assist; stability and traction control; front-seat side airbags; and side curtain airbags for first- and second-row occupants. Toyota's largest SUV received five out of five stars for driver and front-passenger protection in government frontal-impact testing. Whether on city streets or dirt trails, the Sequoia handles well for a full-size SUV, providing both a smooth ride and easy maneuverability around turns. Those hoping for explosive V8 power will be disappointed, but the Toyota Sequoia offers fully adequate acceleration and an overall refined demeanor that family-oriented buyers will find appealing. The cabin design in the Toyota Sequoia is a bit dowdy, but ergonomics are generally good and most materials are high in quality. The standard seating configuration accommodates eight, though opting for the Limited model's luxury package drops capacity to seven by placing captain's chairs in the second row. As in most large SUVs, putting three kids three across in the third row is too close for comfort. Toyota lists maximum cargo capacity at The liftgate has a power-down rear window, which is convenient for hauling longer items. Doing so could save you hundreds or thousands of dollars. Would recommend this vehicle to anyone looking for an SUV that is big and holds a lot of stuff. So many little problems. I bought a Toyota for their supposed great customer satisfaction and reliability. I must say that this not what I have experienced. The car does start and run just fine. The problem lies in all the little things going wrong and the number of times that dealer visits are required. So far both mirrors have gone loose. The clock has failed, the rear hatch won't stay open, the power outlets have failed On top of that, the dealer and Toyota Corporate are great at stating that not all problems can be fixed under warranty even though the warranty has not expired. I still have 18 months left on the warranty and 10k miles to go. Read less. Find a ? BUY a ! I was lucky enough to have purchased the extended warranty so I haven't had to pay for these repairs out of pocket but I am very worried about what this vehicle is going to cost me in the long run. I am pretty sure I will dump it when it is paid for. This is a shame because I really like the vehicle from a users point of view. My last issue was with the fuel pump at 45, miles.
